

dotnamecpp::utils::
UtilsFactory::createPlatformInfo

```
graph LR; A["dotnamecpp::utils::  
UtilsFactory::createPlatformInfo"] --> B["dotnamecpp::utils::  
PlatformInfoFactory  
::create"]
```

A diagram showing a call from a function in dotnamecpp::utils::UtilsFactory to a static method in dotnamecpp::utils::PlatformInfoFactory. The source function is createPlatformInfo, and the target method is create. A blue arrow points from the source to the target.
