

dotnamecpp::utils::
Result< void, E >::Result

dotnamecpp::utils::
Result< void, E >::Result

dotnamecpp::utils::
Result< void, E >::error

```
graph LR; A["dotnamecpp::utils::  
Result< void, E >::Result"] --> C["dotnamecpp::utils::  
Result< void, E >::error"]; B["dotnamecpp::utils::  
Result< void, E >::Result"] --> C;
```

The diagram consists of three rectangular boxes. On the left, there are two white boxes with black borders, each containing the text 'dotnamecpp::utils::Result< void, E >::Result'. On the right, there is a single gray box with a black border containing the text 'dotnamecpp::utils::Result< void, E >::error'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating a relationship or mapping between the two 'Result' types and the 'error' type.
