

src/Utils/String/StringFormatter.hpp

```
graph BT; A[src/Utils/String/StringFormatter.cpp] --> B[src/Utils/String/StringFormatter.hpp]; C[src/Utils/UtilsFactory.cpp] --> B;
```

The diagram illustrates a C++ project structure. At the top is a header file, `src/Utils/String/StringFormatter.hpp`, enclosed in a grey box. Below it are two source files, `src/Utils/String/StringFormatter.cpp` and `src/Utils/UtilsFactory.cpp`, each in a white box. Two blue arrows point from the source files up to the header file, indicating that both source files include the header file.

src/Utils/String/StringFormatter.cpp

src/Utils/UtilsFactory.cpp
